Special person

Pick someone special (partner, kid, friend), find numbers for that person:
 Birth day of the month _____
 Birth month number _____
 Birth year _____
 Phone number _____

Numerology instructions

Find **numbers from 1 to 24** for each blank - if a number is larger than 24, add the digits to each other, then again if needed, until you reach a number 24 or smaller.

Examples:

- ▶ If your birth day is the 29th, add $2+9 = 11$, so this number is **11**.
- ▶ If your birth year is 1982, add $1+9+8+2 = 20$, so this number is **20**.
- ▶ If your home address number is 8959, add $8+9+5+9 = 31$, which is still higher than 24, so $3+1 = 4$, so **4** is this number.

You can make choices to create more options, if you want to - for example, if you get 11 and you already have 11 in another space, but you have no 2, you can choose to add $1+1 = 2$ so that one line is 11 and another line is 2, for more variety.

Just fill in the ones you like - skip any that you want to skip for any reason. Or if you want to change one to something else, go for it! For example, if you don't have a favorite sport player, but you do have a favorite season of a tv show, write that number instead - anything you want to use that's a number!

After the spaces are filled in, pick a new smaller number at random, no bigger than 10 - either roll a die, or ask someone to pick a number between 2 and 10, or do the *MASH* game method of drawing a spiral and stopping randomly, then counting the lines from the center out.

Now use that number to pick the order of your stitch pattern numbers (just like the *MASH* game); you can choose to use the numbers at the top or leave them out. Count through your numbers, up to the newly chosen number - that's your first stitch pattern number.

For example, if the new random number picked was **4**, start counting the 1st number, 2nd number, 3rd number, **4th** number - that 4th number is now your first stitch pattern number.

Either start knitting now, using that stitch pattern number, and then when you finish knitting the part, go back to the list and count to the next number to choose your next pattern; or, make a list now, writing down this number for the first stitch pattern, then count to the next number, write that down, and so on, making a list of several numbers to get through the amount of stitch patterns you'll need.

(Numbers at the top correspond with letters of *Numerology* - N is the 14th letter of the alphabet, U is 21st, and so on - the second O is left out, and Y is 25th, so it's looped around to 1.)
